

Assignment 3

- 1) We will use TURNITIN on your submissions so refrain from copying. Discussion is encouraged.
- 2) Use any programming language you feel comfortable for the question.

Consider the following graph.

- 1) Compute the hub and authority score vectors.
- 2) Which nodes are the hubs and which are authorities?

Your program should take a value for “n” as input and return the authority score vectors, hubs and authorities.
